NGUYEN, VI X

ART UNIT PAPER NUMBER

3731

DATE MAILED: 08/20/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	10/060,206	MURRAY, ROBERT	
	Examiner	Art Unit	
	Victor X Nguyen	3731	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 May 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10 is/are pending in the application.
- 4a) Of the above claim(s) 11-15 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

1. Claims 11-15 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on 05/20/2004.

Specification

2. This application does not contain a summary of the disclosure as required by 37 CFR 1.72(b). A summary of the disclosure is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-6 and 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Roubin et al (U.S. 5,827,321).

Roubin et al disclose, in figs. 3, 10 and 11a-11c, a tubular stent (40) comprising first and second ends and being deformable between compressed and expanded configurations, the compressed configuration has a pattern density adjacent the first end (78 on the right side of 40 as best seen in fig. 10) that is greater than a pattern density adjacent the second end (78 on the left side of 40 as seen in fig. 10). Note that the expanded configuration has a transverse dimension at the first end that is larger than a transverse dimension at the second end (fig. 10).

Regarding claims 5-6, Roubin et al disclose the first end is flared to a transverse section (40a, fig. 11a) and the second end is generally circular in the transverse section (40c, fig. 11c) such that the stent is capable for implantation proximally in a vessel bifurcation, and where at least one tubular stent (40) is distally abutting the first end of the stent.

Regarding claims 9-10, Roubin et al disclose the stent further comprises a series of cylindrical hoop elements (78, fig. 10), where the hoop has a serpentine filament forming a number of crowns disposed about the circumference of the hoop element, and where at least one hoop element adjacent the first end has a greater number of crowns than the hoop elements proximal thereto (as best seen in figs. 9-10).

Claims 1-2 and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Leonhardt et al (U.S.5,957,949).

Leonhardt et al disclose, in figs. 4-5 and 9b, a tubular stent (26) comprising first and second ends and being deformable between compressed and expanded configurations, the compressed configuration has a pattern density adjacent the first end (20 as best seen in fig. 4) that is greater than a pattern density adjacent the second end (46 as seen in fig. 4). Note that the expanded configuration has a transverse dimension at the first end that is larger than a transverse dimension at the second end (fig. 4), and where the system further has a balloon (154, fig. 5) inflatably disposed at a distal end of a catheter (100).

Regarding claims 7-8, Leonhardt et al disclose the inflated shape of the balloon further having a conical (156) distal end.

Conclusion

Art Unit: 3731

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
